We the Granth!

At Granth, we believe the best phase for any brand story is never finished. The phase which keep asking us, what can we do better. And always wonders what's next. What's out there. What's waiting to be discovered. And it's not just the story of a brand or an idea. It's the story of all of us. Always moving forward. Always looking back. Best things are always 'In Progress'. In a world full of Brand Sellers, We are **Story Tellers!**

All he was having a dreams in his eyes and cofidence at right place...
But all he was in Dilemma!

Without wasting a moment,
he gathered pieces of timbers and started shaping them...

Granth Story

Our endeavour to embrace a new tomorrow starts with our ideas and thinking. It is an idea which resonates among people. It is the relevance of it which connects people. Which is why, we are voicing ideas, bouncing off in this vast landscape of advertising around us to push the boundaries and create relevant unforgettable experiences. Started our journey in 2019 with small office in Bopal, Ahmedabad, expanded to Surat office and than couple of more offices in Ahmedabad. We have always firmly believe in content.

He met another voyager, who had the same vision.
They started for the common goal to transform this Kayak into a boat!

Our **Deliverables**

Design, when done with the aim of creating a brand's unique identity becomes more than just an exercise of creating a pretty combination of colours and text. Every colour, every element, every word, and even every dot and blank space needs to have a purpose to serve. Not everyone will tell you that! Not because they don't want to but because they don't approach Branding & Design the way we do!

Online Sales, Lead Generation, or Conversion Optimization, whatever your objective, our team will develop a comprehensive digital strategy and deftly execute it. Balancing investment of time and money against the ROI is the key to building a smart digital strategy. We've helped numerous brands choose optimal marketing channels and adjust their focus on them to achieve their digital objectives.

45 minutes
reading appeal

Education never ends, neither after school nor after getting the job of your dreams. Our life is a continuous learning process, although some of us may not be conscious of this.

We have always looked up to successful people as we wanted to be one of them, so we have analyzed their lifestyles thoroughly. It was no surprise to discover that they always make time to read, study and learn far beyond their schooltime. That's why they became great thinkers, innovators and leaders.

When we analyzed our own reading habits, we realized we all were finding excuses for not investing time in this activity. We only read materials that had flashed across our smartphone screens.

Most of our reading consisted of articles on the web. We don't deny that We found excellent articles related to tips, trends and tools used in various areas of activity. We also read funny articles that raised my energy for the entire day, but, personally, we consider that books typically include better writing and higher quality information. They are powerful tools when it comes to improving yourself as a professional or in a field you are passionate about. Furthermore, reading makes you smarter.

The willingness to learn and discover new things is one of the main pillars when it comes to changing your habits and developing healthy new ones. To improve yourself, you should read constantly so that you can stay competitive in your field by learning new techniques and strategies that separate you from others.

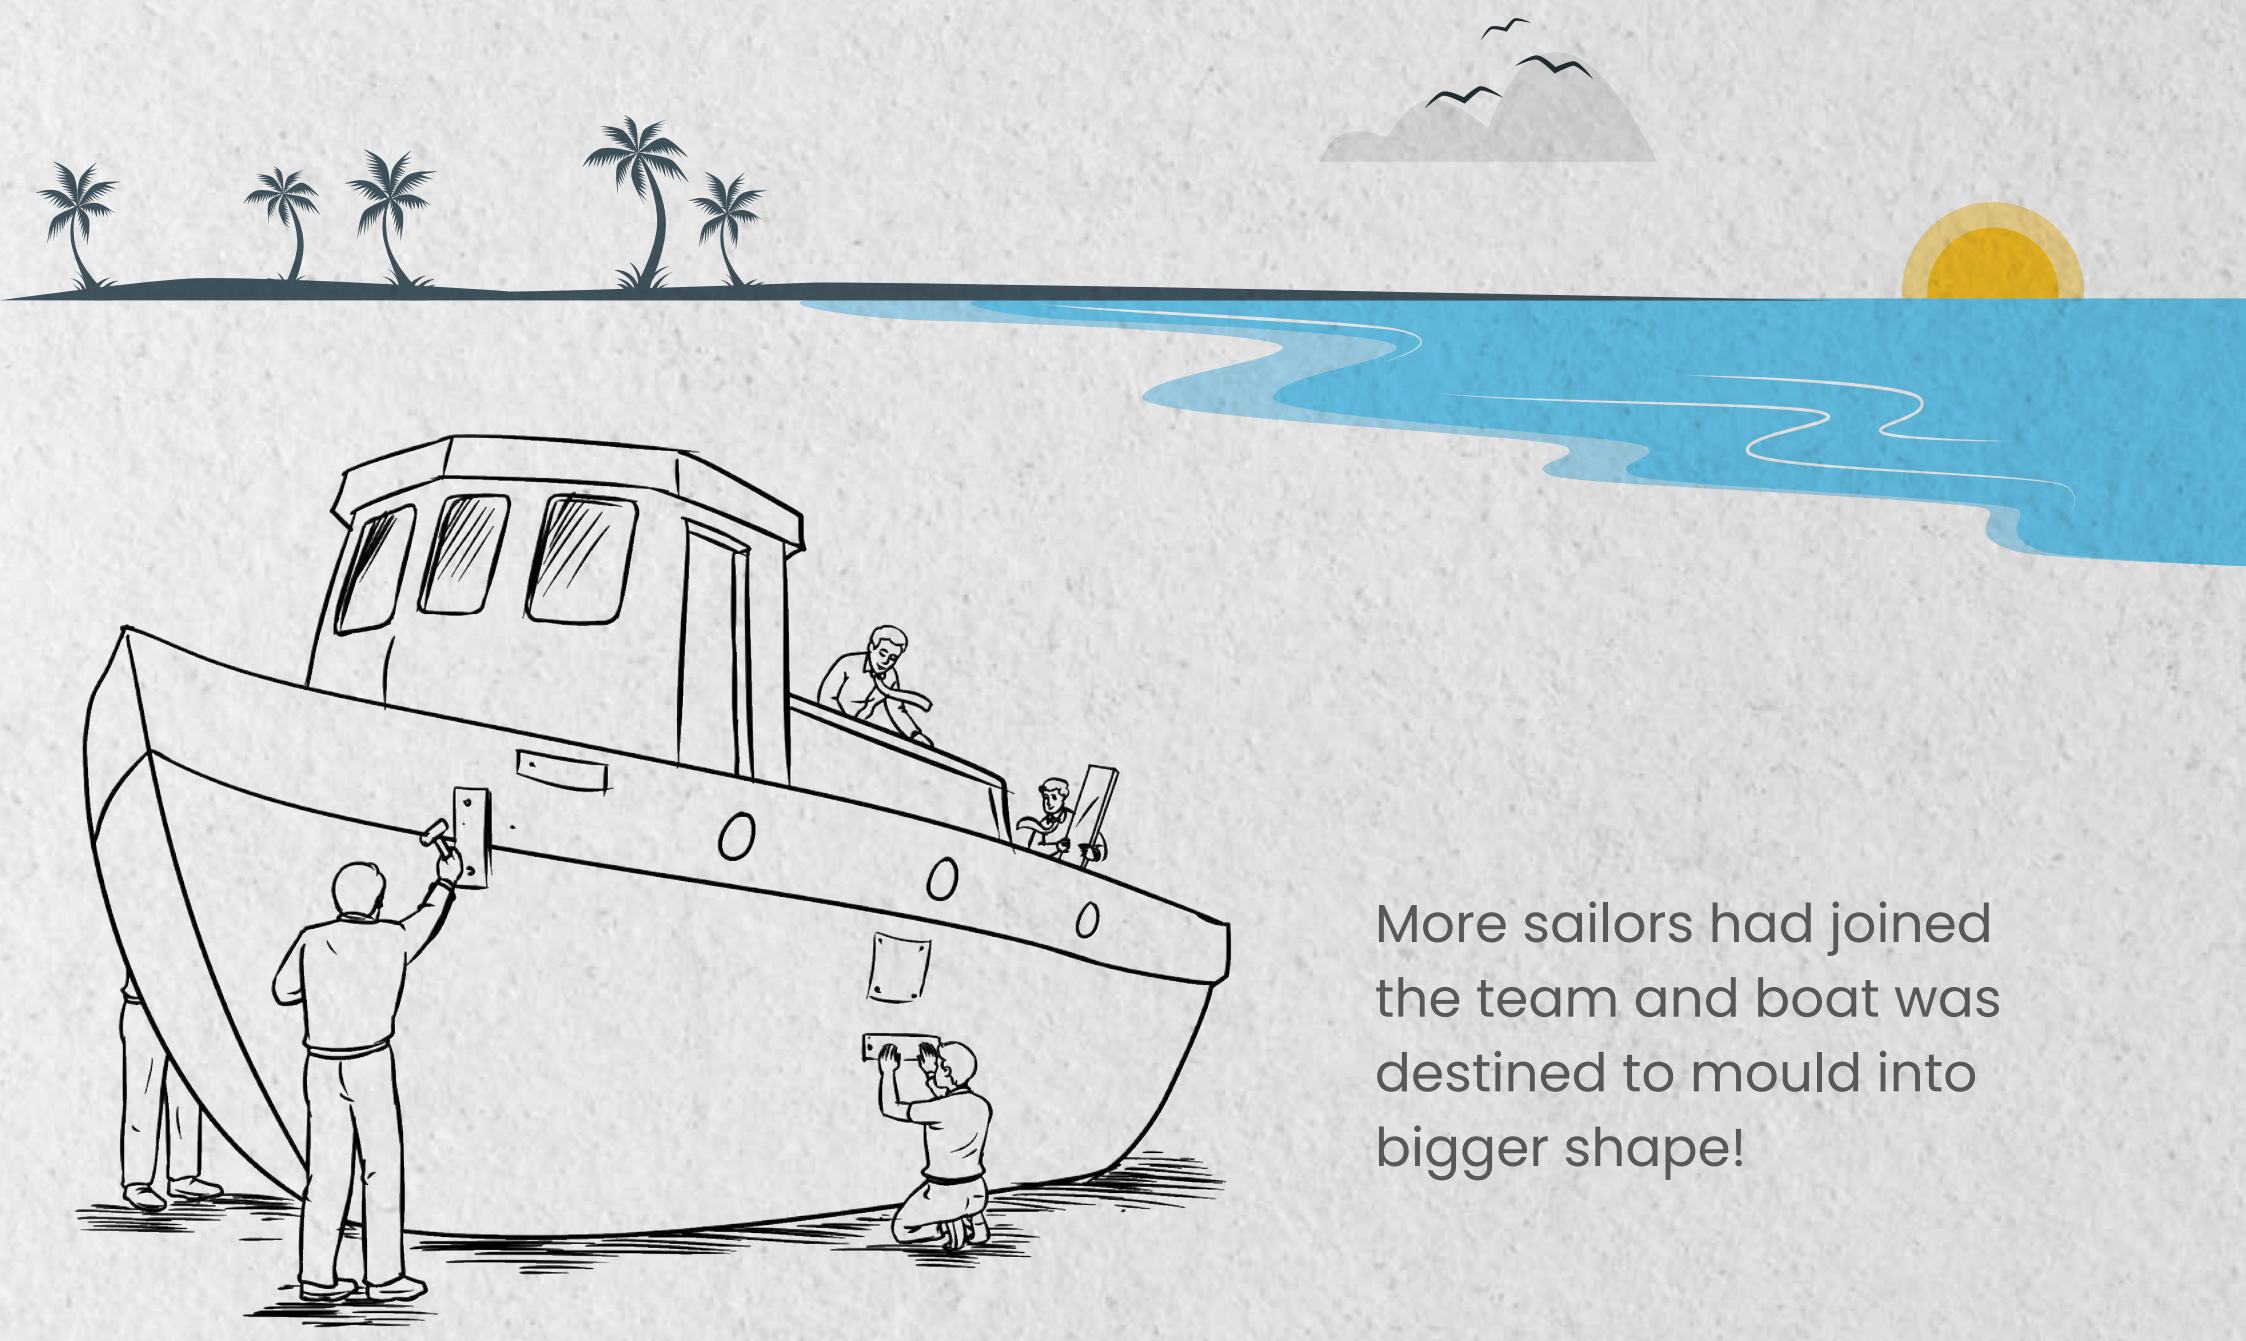
At Granth, we have encouraged our team members to start their day at office by reading books for 45 minutes with utmost discipline. We have developed a library with richness of variety of books comprising of Elon Musk to Piyush Pandey, Sudhir Sitapati to Ashish Chopra. We have got Shrimad Bhagvad Gita to books by Gyanpeeth Awardees. Classics ranging from Agatha Christies to John Grisam, Varun Grover to Ravindra Nath Tagore. We strive to become such that our team members have touch of both literature to advertising science at the same time!

Tidal waves of dangers were rousing, and those two men somehow managed to save the boat from sinking, and keep it floating!

Brand new hope positivity in the post **covid-19** era!

The coronavirus crisis has put a brutal halt to advertising investments, whatever the medium. The drop in advertising revenue ranges from 50% (television, radio) to 99% (billboards) during the weeks of confinement. As we showed in our other analysis, the impact of the COVID on the media, the annual decline in advertising revenues exponentially. Granth too had been affected due to Covid 19 Pandemic.

Gladiators of Granth had however worked from home with utmost productivity and exchanged their work with all smile on video calls! Connected through various IoT tools, team had soon adapted 'New Normal' to keep the business floating. After unlock 1.0, office were reopened and we have almost started recovering, new team members have joined us and new clients kept coming on board. Entire financial year was overshadowed by Covid 19, but Granth have continously fought with all spirit to sail through the tide and ebb!



More sailors had joined the team and boat was destined to mould into bigger shape!
